

# Collaboration, knowledge and information management Microsoft SharePoint

---

## Why invest in a SharePoint platform?

---

A major challenge for businesses is how to manage and share the vast amounts of information generated each and every day and how to use this information to generate business insights.

Microsoft SharePoint is a core business tool that combines knowledge management and information management with an easy-to-use interface. SharePoint is centred on collaboration, enabling your team to work more closely together and be more connected.

It is a powerful presentation platform for business critical data, providing your organisation with new communication capabilities and greater insights.

---

## Our SharePoint offering

---

At NEC, our extensive experience with SharePoint means we can leverage the SharePoint platform to present key business information to your business and external stakeholders, via:

- Intranet
- Portal
- Enterprise search
- Analytics and interactive reporting
- Business process automation and workflow
- Document management
- Knowledge management

## NEC – at the forefront of SharePoint

NEC Australia's SharePoint practice is one of the largest and most experienced in Australia. Our consultants are highly skilled and experienced, and have worked all over the world. NEC specialises in designing, developing and implementing the Microsoft SharePoint platform. Our capabilities and experience across multiple industries enables us to work with you to deliver a solution that is highly tailored to your specific business operations.

We employ a Microsoft SharePoint MVP (Most Valuable Professional). MVP is the highest possible level of certification in both skill and participation in the SharePoint community.

## Our customer success

NEC is a leader in building SharePoint solutions within Australia. Our team consists of some of Australia's most talented SharePoint developers and consultants with diverse backgrounds and deep technical expertise.

Our experienced software professionals use market leading technologies to deliver complete IT solutions tailored to our customers' business requirements.

- **Karara Mining Ltd** needed a centralised online knowledge management centre and collaboration tool for staff.

NEC delivered a scalable SharePoint solution. Key benefits realised from the implementation are:

- A strategic platform for Karara and Gindalbie staff to access business critical documentation held in their document management system
- A system that supports the efficient aggregation of rich content within the site
- Enables end users to track their workflow documents and view assigned tasks
- Easy access to relevant information
- A tagging environment to execute publishing governance procedures
- Seamless integration with external systems
- Powerful document management capabilities
- Powerful enterprise search capabilities
