

New mobile business apps for Microsoft Dynamics AX

Extend your existing ERP solution

Why is mobility for ERP important?

For most Australian businesses, their ERP (Enterprise Resource Planning) solution is their biggest and most expensive IT asset. ERP systems hold huge amounts of company data, mainly financial and HR information, and are traditionally accessible only through a desktop or laptop computer. With the rising increase of the mobile workforce, it's not surprising that ERP systems are now going mobile.

The new Microsoft Dynamics AX mobile business apps enable your staff to instantly and easily access your company's ERP systems from any device. These new apps are all designed with a rich, touch-enabled user experience to encourage higher user adoption. Having access to these new apps will reduce the time your staff spend on administrative tasks and facilitate live progress updates so they can focus more on customers and their needs.

What business apps are available?

There are four new business apps available for Dynamics AX:

1. Microsoft Dynamics Timesheets App

Enable your mobile workers to stay productive even when

they are between appointments or in transit. With the Dynamics AX 2012 Timesheets App, staff can create, edit and manage timesheets on the go.

Features include:

- View a list of timesheets
- Create a new timesheet
- Add or modify timesheet entries
- Submit timesheets for approval

2. Microsoft Dynamics Expense App

Minimise the number of missing expense receipts and help your staff keep track of cash expenses while on the road. Staff can create and manage expense reports from anywhere on any device.

Features include:

- View a list of expense reports or unreconciled expenses
- Create an expense report
- Add expenses and receipts to expense reports
- Add a photo to an expense item
- Modify expense reports to provide more detail
- Submit expense reports for approval

3. Microsoft Dynamics Retail App

Give your customers a highly personalised and relevant retail experience to build more profitable relationships. With the Dynamics for Retail App, store assistants can increase upsells, cross sells and help provide your customers with the service they deserve.

Features include:

- View individual customer history, shopping behaviour and wish lists
- View and share product comparisons and reviews
- Quickly provide product recommendations

4. Microsoft Dynamics Approval App

With the simple Dynamics Approval App, managers can quickly and easily approve all kinds of requests from the one place, including:

- Budgets
- Timesheets
- Expense reports
- Purchase requisitions

NEC's Microsoft Dynamics AX practice in Australia

NEC offers a complete end-to-end range of ERP services and solutions. We have a highly skilled and experienced team and have undertaken hundreds of ERP implementations across Australia in a range of industry sectors, with a proven track record of success.
